The Intersection Between Disability and LGBTQIA2+ Communities

1 in 3 (36%) of LGBTQ+ adults have at least one disability vs. 1 in 4 (24%) of non-LGBTQ+ adults have at least one disability

"LGBTQ+ people are more likely to be disabled than non-LGBTQ+ people. The duality of their identities as LGBTQ+ and disabled increases the amount of discrimination and bias they face in their daily lives, at school, at the doctors, or at work"
